**Notes:**

- Week 3 (Highlighted in green) – The afternoon session instructor for Jan. 25<sup>th</sup> canceled yesterday. I left a message with the morning instructor to see if she could do an all day program. Based on her reply will determine if Jan. 25<sup>th</sup> is 3 hour or 6 hour training. If she can only do ½ day training, I will plug in another topic for the afternoon session.
- Week 15 (Highlighted in green) – Dr. McAfee is still juggling his schedule. Other commitments will determine if he is available for all day or for morning session only. Again, I will fill the afternoon session with another topic if needed. Dr. McAfee is confirmed for the morning session.
- Week 11 (Blue print) - Plant Propagation and Woody Ornamentals will be held at the Midland County Extension Office.
- Week 12 (Red print) – Soils Training will be held at the Ector County Extension Office and conducted via Lync or remote video conferencing. Dr. Feagley teaches a class on campus at Texas A&M on Wednesdays, so the trainee class times are different.
